

The image shows the Cameroon exhibition booth at the Paris International Agricultural Show 2026. The booth is a large, modern structure with a white and green color scheme. The word "CAMEROUN" is prominently displayed in green, with "REPUBLIC OF CAMEROON" in red below it. A large, stylized graphic of the Cameroonian flag is integrated into the design. A photograph of a smiling woman wearing a traditional headwrap is a central feature. The background includes images of agricultural products like corn and a landscape. A red carpet runs along the floor in front of the booth.

Attractive reforms and incentives

Cameroon, through the National Agricultural Investment Plan and rural sector modernization policies, encourages :

Public-private partnerships

Targeted tax exemptions

Customs facilities for agricultural equipment

Support for agri-food cooperatives and SMEs

Cameroon's agricultural productive potential thanks to its youth

innovation

With over 7 million hectares of arable land, some of which remains uncultivated, Cameroon possesses vast land reserves for modern and sustainable agriculture. The country is among Africa's leading producers of cocoa and bananas, and demonstrates strong potential in agri-food processing to meet the growing needs of local, regional, and international markets.

A Unique Geostrategic Position

Located in the heart of Central Africa, **Cameroon is a natural hub for accessing a market of over 300 million consumers** (CEMAC and beyond). Its deep-water ports (Douala and Kribi), its road network, and its railway projects make it a prime logistics platform for exporting to Europe, Asia, and the United States.

Tendances

Les tendances montrent une stabilisation avec un potentiel de croissance future.

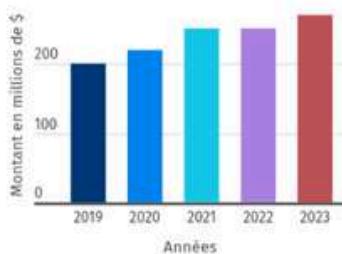

2019

En 2019, l'apport des pêches était estimé à près de 200 millions de dollars.

2021

En 2021, la contribution a fortement augmenté, atteignant 250 millions de dollars.

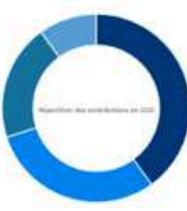

2023

Pour 2023, une prévision de 270 millions de dollars est envisagée avec des efforts d'amélioration.

Fisheries and the economy in Cameroon

A booming fishing sector

With nearly 400 km of Atlantic coastline and extensive river networks, Cameroon has exceptional fishing potential. In recent years, public policies have promoted the sustainable development of artisanal, industrial and inland fishing, while also encouraging the growth of aquaculture.

2020

En 2020, les pêches ont montré une croissance modérée, contribuant à 220 millions de dollars à l'économie.

2022

En 2022, l'apport a stagné à 250 millions de dollars en raison de divers défis.

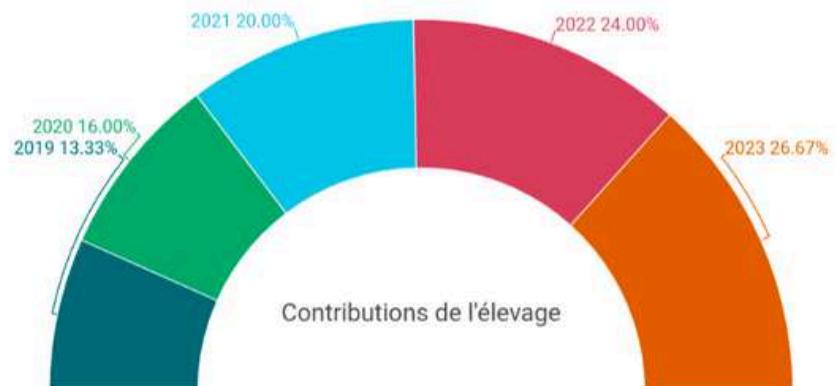

Défis

Les défis incluent la surpêche et l'impact climatique affectant les ressources halieutiques.

Livestock between tradition and modernization

Alongside the traditional cattle farming sector, Cameroon is experiencing rapid modernization of pig farming, driven by the Pig Sector Development Project (Proporc), initiated by CAPEF. This project focuses on genetic improvement, professionalizing farmers, and structuring value chains.

Représentation de l'apport de l'élevage à l'économie camerounaise sur 5 ans.

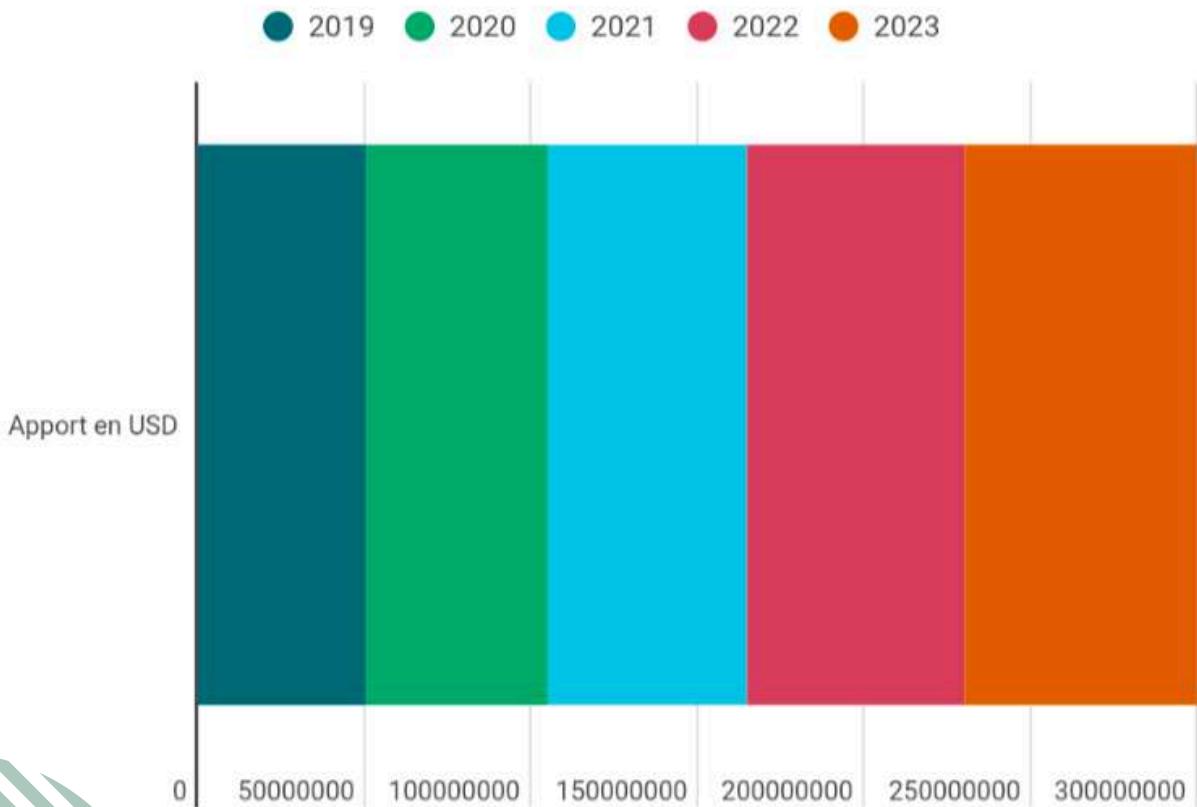

A rich Forest Heritage

Nearly 40% of the national territory is covered with precious tree species: ayous, sapelli, azobé, bubinga, iroko, among others. The country is committed to the sustainable management of forest resources, combining conservation, certification, and local processing.

Foresterie

Analyse de l'apport économique de la foresterie au Cameroun sur cinq ans.

Expected Outcomes for Cameroun in 2026

Economic performance & exports

- Cocoa exports: + 20%
- Target: 300,000 tons/year
Enhanced valorization of processed products (chocolate, butter, cocoa powder)

Investments & modernization

- €50-100 million in investments
- Modernization of value chains: cocoa, coffee, banana, organic farming

Jobs & socio-economic inclusion

- Over 5,000 jobs created
- 500-1,000 direct and indirect jobs per project

New markets & innovation

- +30-40% added value
- Premium segments: origin coffee, organic honey, certified banana

A CALL TO PARTNERS

Investing in Cameroon means investing in fertile land, an ambitious people, and a rapidly expanding market. Through the 2026 Paris International Agricultural Show, Cameroon invites institutional, private, and technical partners to join this momentum and build a prosperous agricultural future together.

opportunities.

With the support of

Ministry of Agriculture and Rural Development

The Ministry of Agriculture and Rural Development (**MINADER**) leads the national agricultural policy with the ambition of modernizing the agricultural sectors, boosting competitiveness, empowering rural youth and women, while ensuring sustainability.

Ministry of Trade

Accompanying
Ministry

The Ministry of Trade works to regulate markets, protect consumers, and promote exports. Given Cameroon's huge agricultural and agro-industrial potential (cocoa, coffee, bananas, cotton, palm oil, processed products), this ministry supports producers and businesses in meeting international standards.
